

ExamChecker

AI-POWERED EXAM GRADING

**Grade a full exam cycle in hours —
not weeks — for a third of the cost.**

A proposal for schools, colleges and individual teachers who want faster results, more consistent marking, and a grading budget that finally makes sense.

₹33 PER STUDENT, ALL SUBJECTS	66% LOWER COST ON AVERAGE	90% LESS GRADING TIME	Same day RESULTS TURNAROUND
--	--	---------------------------------	---------------------------------------

SECTION 01

Executive Summary

ExamChecker reads handwritten student answer sheets and returns marked, report-ready results in seconds — at ₹33 per student for every subject they sit.

Grading is the single largest recurring drain on an institution's academic time and budget, yet it produces no teaching value. Qualified staff spend evenings and weekends reading handwritten scripts, results take two to three weeks to publish, and identical answers routinely receive different marks depending on who marked them and when.

ExamChecker replaces that process. Teachers photograph the answer sheets, upload them, and the platform extracts the handwriting, applies the teacher's own mark scheme, and awards marks using the same key-points methodology a trained examiner follows. The teacher reviews and can override anything before results are finalised — the AI does the labour, the teacher keeps the authority.

The commercial case in one line: manual grading costs ₹75–₹120 per student per exam cycle once all subjects are counted. ExamChecker costs a flat **₹33** — a saving of **₹42 to ₹87 per student, every cycle**, with results available the same day instead of weeks later.

SECTION 02

What Manual Grading Actually Costs You

The cheque written to examiners is only the visible part. Four costs compound every single cycle.

Time that can't be recovered

25–40 minutes per answer sheet. Across 6 subjects that is 2.5–4 hours of skilled professional time for a *single* student — time taken directly out of lesson planning and teaching.

Direct grading spend

At ₹15–₹20 per sheet across 5–6 subjects, each student costs ₹75–₹120 to mark. A 500-student institution spends ₹37,500–₹60,000 per cycle — before any admin overhead.

Inconsistent marking

Fatigue, mood and interpretation drift mean the 90th script is not marked like the 1st. Two students writing the same answer can receive different scores — which invites disputes and erodes trust.

No searchable record

Paper leaves no audit trail. Re-checking a mark, answering a parent's query or analysing which topics a class failed means physically retrieving stacks of scripts.

The hidden multiplier: slow grading delays feedback. By the time marks reach a student two or three weeks later, the class has moved on and the corrective value of the exam is largely lost.

Cost Comparison

The case for ExamChecker is straightforward arithmetic. Here is the like-for-like comparison.

Per student · per exam cycle

METHOD	RATE	SUBJECTS COVERED	TOTAL PER STUDENT
Manual grading Examiner reads each script individually	₹15–₹20 / sheet	5–6 subjects	₹75 – ₹120
ExamChecker All subjects, all questions, flat rate	₹33 flat	All subjects	₹33
You save	—	—	₹42 – ₹87

COST REDUCTION PER STUDENT

56% – 72%

66% against the median manual cost of ₹97.50

PUT ANOTHER WAY

₹28 – ₹44

ExamChecker's cost for every ₹100 you spend today

Assumptions: manual rate of ₹15–₹20 per answer sheet reflects standard examiner honorarium rates; 5–6 subjects per student per cycle. Substitute your own figures and the ratio holds — ExamChecker's price does not move with subject count.

Savings at scale · per exam cycle

INSTITUTION SIZE	MANUAL COST	EXAMCHECKER	SAVED PER CYCLE	SAVED PER YEAR (3 cycles)
200 students Small school	₹15,000 – ₹24,000	₹6,600	₹8,400 – ₹17,400	₹25,200 – ₹52,200
500 students Mid-size school	₹37,500 – ₹60,000	₹16,500	₹21,000 – ₹43,500	₹63,000 – ₹1,30,500
1,000 students Large school	₹75,000 – ₹1,20,000	₹33,000	₹42,000 – ₹87,000	₹1,26,000 – ₹2,61,000
2,000 students College / group	₹1,50,000 – ₹2,40,000	₹66,000	₹84,000 – ₹1,74,000	₹2,52,000 – ₹5,22,000

A 500-student school running three exam cycles a year frees up **₹63,000 to ₹1,30,500 annually** — enough to fund a computer lab refresh, a part-time staff appointment, or a full year of classroom materials, from the grading line alone.

Time Comparison

Money is the easier argument. Time is the more important one — because teacher hours are the resource you genuinely cannot buy more of.

Per student · 6 subjects · one exam cycle

STAGE	MANUAL	EXAMCHECKER	DIFFERENCE
Reading & marking each script	25–40 min / subject	~30 sec / subject	—
Capture, upload & teacher review	n/a	~2.5 min / subject	—
Tallying marks & writing the report	10–15 min	Automatic	—
Total time per student	2.5 – 4.0 hrs	~18 min	88% – 92% less

Note: the ExamChecker figure deliberately *includes* the teacher's own review time. It is not the raw machine speed — it is the realistic end-to-end time with a human checking the output.

What that means for real workloads

WORKLOAD	MANUAL GRADING HOURS	EXAMCHECKER HOURS	HOURS RETURNED
One class of 40 6 subjects, one cycle	100 – 160 hrs	~12 hrs	88 – 148 hrs
School of 500 6 subjects, one cycle	1,250 – 2,000 hrs	~150 hrs	1,100 – 1,850 hrs
School of 500 full academic year, 3 cycles	3,750 – 6,000 hrs	~450 hrs	3,300 – 5,550 hrs

Across one academic year, a 500-student school recovers the equivalent of roughly **two full-time staff years** of professional time — without hiring anyone.

Turnaround: the difference students actually feel

Manual · 2–3 weeks

Scripts are distributed, marked over evenings and weekends, collected, tallied, cross-checked, then compiled. Feedback lands long after the topic has passed.

ExamChecker · same day

Sheets are photographed and evaluated the same afternoon. Per-question reports are ready immediately, so weak topics are re-taught while they still matter.

SECTION 05

What You Get for ₹33

₹33 is not a stripped-down entry tier. It is the complete platform — every feature, every subject, every time.

Handwriting recognition

Reads handwritten answers straight from phone photos or scans. No typing, no special paper, no scanner required.

Key-points marking

Marks awarded point-by-point against your own mark scheme — the methodology CBSE and Cambridge examiners are trained on.

Batch evaluation

Upload every page at once; one click grades every question on the paper together.

Video page capture

Flip through the answer booklet on video — the platform detects and extracts each page automatically.

Keyword enforcement

Mark required terms as mandatory. A missing key term caps the score, exactly as a real mark scheme would.

Full teacher override

Every extracted answer and every mark is editable before finalising. The AI assists; the teacher decides.

Instant reports

Per-question, per-student reports generated the moment grading finishes — ready to print or export as PDF.

Analytics

Performance trends across exams, subjects and sections, so weak topics surface on their own.

Question bank & paper builder

Build a reusable library with AI-generated model answers, then assemble printable papers in minutes.

Secure accounts & history

Each teacher gets a private login with full session history, synced across devices. Data is never shared between institutions.

SECTION 06

Accuracy You Can Defend

A grading tool is only worth adopting if you can stand behind its marks in front of a parent. ExamChecker uses the key-points method that professional examiners are trained to follow.

For each question the teacher supplies the model answer. ExamChecker breaks it into distinct scoreable points — typically one per mark — and for each point awards:

- ✓ **Full credit** — the student stated the point correctly. Spelling and grammar are ignored.
- ✓ **Half credit** — partially addressed: vague, incomplete, or containing a minor error.
- ✓ **No credit** — wrong, reversed, or not mentioned at all.

The score is *credits earned* ÷ *total scoreable points*. The same formula works for a 1-mark definition and a 15-mark essay. Three marking strictness levels — **Easy**, **Medium** and **Strict** — let you match your institution's standard, and all marks round to clean 0.5 increments.

“Factual errors — swapping terms, reversing cause and effect, citing the wrong name — always reduce credit for that point. A long, verbose answer that gets the facts wrong still loses marks. A short, precise answer covering every point earns full marks. Brevity is never penalised.”

EXAMCHECKER MARKING SPECIFICATION

The teacher is never removed from the loop. Extracted text and awarded marks are both editable, and any answer can be re-evaluated after correction. ExamChecker is built to do the reading and the arithmetic — not to overrule your professional judgement.

Pricing

One transparent price. No subscription, no per-question fee, no subject surcharge. You pay only for students you actually grade.

₹33

per student · per exam cycle · all subjects included

All subjects

All questions

Batch evaluation

Analytics

Teacher override

Question bank

History & audit trail

Volume pricing available for institutions grading 1,000+ students per cycle.

For schools & colleges

Institution-wide account, unlimited teacher logins, consolidated history and analytics across every class and section. Billed per student, per cycle.

For individual teachers

Same ₹33 rate, same complete feature set, no minimum commitment. Grade one class or one student — you are only charged for what you actually run.

Why ₹33?

Manual grading costs ₹75–₹120 per student. We have priced ExamChecker at under a third of that — not as a loss-leader, but because AI infrastructure genuinely costs less than skilled human hours, and we pass that difference on rather than pocketing it. The intent is a price that is difficult to justify ignoring.

Questions We Are Usually Asked

? What happens if the AI marks something incorrectly?

You correct it. Every extracted answer and every mark is editable, and any answer can be re-evaluated after you fix the text. Nothing is published until the teacher confirms it.

? Do we need scanners, special answer sheets or new hardware?

No. A phone camera is enough. ExamChecker works with ordinary answer booklets photographed as-is, and runs in any modern browser on any device.

? How well does it handle poor handwriting?

Well in most cases, and where it struggles the extracted text is shown to the teacher for correction before marking. You always see exactly what the system read.

? Which subjects does it support?

Any subject marked on written answers — sciences, humanities, languages and mathematics. Questions with sub-parts and multi-page answers are handled natively.

? Is our student data kept private?

Yes. Each teacher account is isolated, exam records are tied to that account, and data is never shared between institutions or used to train models.

? How much training will our staff need?

Effectively none. Most teachers grade their first paper within ten minutes of signing in — the workflow is set up the paper, photograph the sheets, click evaluate.

SECTION 08

Getting Started

No hardware, no installation, no training programme. ExamChecker runs in any modern browser, on any device.

1 Create your account

Sign up with an institutional email. Under 60 seconds. No card required to start.

2 Set up the paper

Enter questions and model answers, or upload an existing question paper — ExamChecker extracts the questions automatically.

3 Capture the answer sheets

Photograph the pages, or record a quick flip-through video and let the platform split it into pages for you.

4 Evaluate and publish

One click grades every question. Review, adjust anything you disagree with, then generate the report.

Try it before you commit. Run one real class through ExamChecker alongside your normal marking and compare the results yourself. We are happy to arrange a guided pilot for your institution at no cost.

SECTION 09

The Proposal at a Glance

MEASURE	TRADITIONAL MANUAL GRADING	WITH EXAMCHECKER
Cost per student per cycle, all subjects	₹75 – ₹120	₹33
Teacher time per student	2.5 – 4.0 hrs	~18 min
Results turnaround	2 – 3 weeks	Same day
Marking consistency	Varies by marker & fatigue	Identical rules every script
Records & analytics	Paper only	Searchable, per-question
Annual saving · 500 students 3 exam cycles	—	₹63,000 – ₹1,30,500
